WORKING EXPERIENCE

PT Ciptadra Softindo, Depok — Jan 2025 – Present
Scrum Master

- Facilitate all Scrum events (Sprint Planning, Daily Stand-ups, Sprint Review, and Sprint Retrospective).
- Help the team remove impediments and ensure smooth workflow.
- Work closely with the Product Owner to prioritize the backlog and ensure sprint goals are clear and achievable.
- Identify areas for process improvement and encourage the team to adopt best practices.
- Provide regular updates on project progress, risks, and deliverables.
- Track and report key Agile metrics (e.g., velocity, sprint burndown, cycle time) to measure team performance and progress.

PT Ciptadra Softindo, Depok — Aug 2023 – Present
QA Engineer

- Developed and executed comprehensive test plans and test cases for Onebox CRM.
- Actively contributed to agile development cycles by participating in sprint planning, daily stand-ups, and retrospective meetings.
- Reported, tracked, and monitored defects using JIRA, ensuring clear communication of issues.
- Developed and executed automated test scripts using Katalon Studio and Playwright, enhancing testing efficiency and accuracy.
- Designed and executed comprehensive automated test plans, test cases, and test scripts to identify, document, and troubleshoot software defects.
- Regularly updated scripts and test cases to align with evolving requirements.
- Understand software development principles and the software development lifecycle (SDLC).

PT Integrasi Jaringan Ekosistem, South Jakarta — Aug 2022 – Feb 2023
Internship - Backend Developer

- Development and Programming: Proficient in languages such as PHP and Node.js, I design, develop, and program backend components.
- Database Design: Skilled in designing database structures, tables, and schemas, I am experienced in utilizing relational databases like MySQL.
- Optimize backend application performance to ensure scalability and high availability.
- Monitor and debug backend issues to ensure optimal user experience.
- Supervise and troubleshoot backend problems to enhance user experience, ensuring optimal performance.

EDUCATION

Undergraduate Universitas Bina Sarana Informatika, Depok — Aug 2023 – Jul 2027
Degree in Information System

- Served as a team lead in developing a Web Application using React, Node.js, MongoDB for academic projects.
- Developed 5 projects independently.
- Strong problem-solving and analytical skills.

SMK Taruna Bhakti, Depok — Jul 2020 – Jun 2023
Software Engineering

- Participated in a government-initiated project to improve vocational school facilities and infrastructure in West Java. Contributed to frontend development by designing and developing intuitive user interfaces.
- Actively participated in various web development competitions.
- Developed several personal projects to deepen my understanding of React, Laravel, Python. These projects include e-commerce web application, a personal blog.

PORTFOLIO

Implementator (QA Engineer) — Sep 2026
Enhancement Contact Center Ciputra Life NBUW - PT Asuransi Ciputra Indonesia

- Developed and maintained automated test scenarios using Katalon Studio and Playwright to improve regression coverage and testing efficiency.

- Validated call disposition and business-rule mapping to ensure each interaction generated the appropriate Next Action based on the selected call status and reason.
- Tested outbound call workflows to verify customer contact status, follow-up actions, and CRM case updates were correctly recorded after outbound interactions.
- Supported UAT activities by preparing test scenarios, executing validation, documenting findings, and verifying defect fixes.

Implementator (QA Engineer) Jun 2026
Tipidkor Polri - Kakortas Tipidkor Polri

- Developed and executed automated test scenarios using Katalon Studio to validate critical application workflows and improve regression testing efficiency.
- Tested OCR-based document processing to verify document extraction accuracy, field mapping, and automatic data population across complaint and case management workflows.
- Validated disposition workflows to ensure cases were processed according to defined business rules, workflow stages, and user access permissions.
- Performed role-based access control testing to ensure users could only access features and perform actions according to their assigned roles and permissions.
- Tested digital signature (TTE) workflows and document generation to ensure approval processes, signed documents, and generated letters were completed correctly.

Implementator (QA Engineer) Feb 2026
Contact Center ATMi - PT Abadi Tambah Mulia Internasional

- Design, develop, and execute test cases, test scenarios, and test plans based on system requirements and business processes.
- Perform various testing methodologies including functional testing, integration testing, regression testing, and user acceptance testing (UAT) support.

Implementator (QA Engineer) Aug 2024
Contact Center Mandiri Tunas Finance - PT Mandiri Tunas Finance

- Responsible for ensuring the quality of the Contact Center Mandiri Tunas Finance system and services through comprehensive testing. Proficient in various testing methodologies to guarantee smooth operations and customer satisfaction.

Implementator (QA Engineer) Aug 2024
Contact Center TOB Insurance - PT Asuransi Total Bersama

- Successfully enhanced the quality of TOB Insurance Contact Center services through comprehensive testing strategies. Experienced in identifying and resolving critical bugs, as well as optimizing business processes to achieve higher customer satisfaction.

Implementator (QA Engineer) Oct 2023
Enhancement Contact Center Ciputra Life - PT Asuransi Ciputra Indonesia

- As an Implementator (QA Engineer), I was responsible for ensuring the quality of Ciputra Life Contact Center services through the implementation of effective testing strategies.
